

\$APES

the craziest MemeCoin on Kaspa KRC-20

Apes ain't anything without \$Banana

Banana ain't anything than for \$Apes

\$Apes:

Total supply:	420,000,000,000
Premint:	372,000,000,000
To mint (11.4%):	48,000,000,000
Tokens per mint:	420
Mints possible:	114,285,714 (kaspa miners get huge support from apes)

Where to ape into \$APES:

Attention: Those initial OTC and Marketplace **start prices** will go up significantly according to the vibes and rhythms of the \$Apes

OTC sales: 420 kas get 84,000,000 \$Apes

Sales link on <https://X.com/MadMaxMeme>

Marketplace: 444 Kas get 80,000,000 \$Apes

https://t.me/kspr_home_bot?start=PS8u4w

Minting: 420 mints get 176,400

https://t.me/kspr_home_bot?start=PS8u4w

\$BANANA to \$Apes OTC swap: ??? \$Banana get 4,200,000 \$Apes coming soon.

OTC Maximum per wallet: 5040 Kas

Let's see which human degens have aping more brain than an average aping \$Ape - aping at best price into \$Apes.

\$Banana will have it's own OTC soon following. Meanwhile you can mint at 100x + higher costs billions of times some \$Banana's or \$Apes to support the miners not the \$Apes & \$Bananas.

Attention: The sales price for OTC and Marketplace will go up - when some \$Apes think they are to cheap - at an unknown time.

Price will go up for sure once 10% of supply is sold.

Once 50% of total supply is sold, krc20coins community or an yet to build up \$Apes community will decide whether to burn the rest or put on sales at 1000x to 100000x.

90% of sales funds are used for liquidity pools, fees for management, platform listings and \$Apes price support. \$Apes is backed in KAS (treasury liquidity wallet) by your investment from buying it on OTC or Marketplace, \$Apes is not on 100% thin air ("fair mint") - having pumped all Kas in minting to miners which dump them into the market and won't care an Ape for \$Apes.

\$Apes is a community memecoin, distributed fairly to a widespread crowd of aping degens.

King of Coins (\$Mambo) only manages those initials sales and then it will run on its own.

Wanted: \$Apes needs a graphic creator

If you are good in creating a lot of cool \$Apes graphics, post some of the propositions in the t.me/MadMaxMeme group. Hopefully there are some contenders aping for this aping fun job. Tell us how much you want as one time payment in \$Apes for becoming the community chosen graphics godfather of \$Apes. You will get the job although for \$Banana and get \$Bananas. You may want to open an X account for the craziest unique \$APES Kasper KRC-20 memecoin and maybe a \$Apes telegram group too.

....

Eating some \$Banana - what is left to say yep:

Aaps: Community \$APES AIRDROP

Airdrops for active community members of t.me/krc20coins and t.me/MadMaxMeme based on merit. If you are an active \$Apes \$Banana and \$MadMax degenerate, shilling genuinely those memecoins, and you get into the attention of \$MadMax - you can get good surprise.

Socials for \$Apes:

Join t.me/MadMaxMeme - follow: x.com/MadMaxMeme

Thanks \$Madmax and \$Mambo for hosting \$Apes

Apenomics: simple, 100% fair, no traps.

Total supply: 420,000,000,000 tokens

Mint: 11.42% 48,000,000,000 Token per mint: 420. Mints possible 114,285,714

Sales (OTC and Marketplace): 62.58%: 262,800,000,000

Liquidity pools: 25 %: 105,000,000,000

Airdrops/Rewards: 0.5%: 2,100,000,000

Token Management: 0.5%: 2,100,000,000

Transparency:

\$Apes sales funds treasury for LP funding and token price support.

Sales wallet temporary (bot 4): `kaspa:qzca24pevy0k7ehlmnu4yt2z2ypee72n0ddsz86mqk3r9f2zw562stvrnermv`

Sales reserves: `kaspa:qzqapfyjecffdm9ds2rml4amhzy4gnv2lhrhslnrcjxx2smrxzncrfukk4`

Funds treasury for LP and token price support:

Token Managment: `kaspa:qq5p83nekce48kuadxddqx7swqcew7jgpezynxsen7cdeg5nzhag63ve9tld`

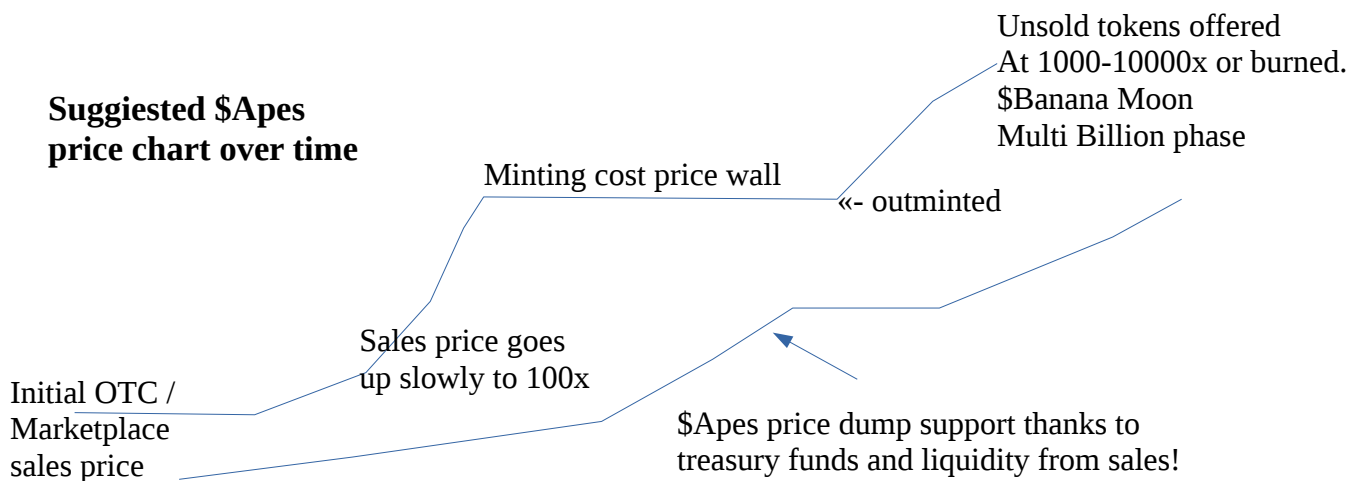

\$Apes Math and Wisdom

How to ape best way into \$Apes:

1. You get the best price aping in early and buying \$Apes on the OTC.
2. You get second best price buying it on kspr Marketplace
3. \$Apes strongly recommend not to mint until all is sold or the rest is burned.

Minting gets you up to 100x less tokens for the spend Kas.

This gives \$Apes an initial 100x potential (to Kas) - and then the Mining acts as a sales wall, until all 114 Million mints are outminted.

This in not only fair, but aping better than fair.

\$Apes Acosystem:

A small part of funds maybe used to deploy tokens which fit to the \$Apes Ecosystem like \$Banana.

Others tickers may follow.
